

Dolly Trolley

Product Code: BMP044

Made in our Australian Factory.

Bremco's BMP044 dolly trolleys move heavy loads safely using pneumatic wheels to get across all types of terrain. The tag-a-long handle clips into the vertical position when not in use and can be removed if needed. Heavy duty steel construction with solid floor and mesh panel sides mean that most small and heavy parts can be moved.

This trolley comes in two different dimension options, a large and a small.

We can also custom fabricate a dolly trolley for your specific requirements. Read more about how we can work with you to develop the ideal custom steel fabrication solution for your warehouse.

Keep your workplace safe and operating effectively with Bremco made trolleys.

Specifications

- WLL: 250kg
- Wheels: 200mm Diameter pneumatic castors
- Finish: powder coated safety yellow

NB: Removable back for convenience. Complies with AS2359.1 section 12. Compliance plate and serial number attached.
