

Crane First-Aid Rescue Cage

Product Code: BMP068-First-Aid

Use your crane to reach new heights.

The Bremco Crane First Aid Rescue Cage is designed to be suspended from a crane and used for the emergency retrieval and first aid rescue of injured workers on a work site. Crane rescue first aid cages must be made available and readily accessible on the work site as an effective emergency response.

Our cage is Australian Made and designed to Australian Standard AS1418.17. It has also been designed and registered to comply with the QLD Tower Crane Code of Practice 2017 (PN12040).
